

Ontario's Public Engagement Framework

Share

Inform the public about a public service initiative.

Ontarians receive information about a government program or decision in a way that is accessible to them

This is one-way communication

Consult

Gather public views on an issue, policy or decision.

Ontarians have opportunity to weigh-in on a matter of concern

Participants see themselves as advocates for their views on a subject

Deliberate

Work with public in varying degrees of depth to frame an issue and/or arrive at solutions.

From...

Identifying and understanding the issue

To...

Developing a strategy that government commits to deliver

Participants find common ground and collectively arrive at an agreement

Collaborate

Work with public to frame an issue, arrive at and deliver solutions.

Ontarians work with government to define an issue, develop **and** deliver solutions

Partners share decision-making and share implementation of solutions
